The German Academic Exchange Service (DAAD), the German Rectors' Conference (HRK), the Osnabrück University of Applied Sciences and the Centre for Higher Education (CHE) are jointly organising the **International Deans' Course for Africa**.

This intensive training course is part of the DIES programme (Dialogue on Innovative Higher Education Strategies) which is coordinated by DAAD and HRK and which aims at strengthening higher education management structures in developing countries.

Programme Contents and Methodology

The key objective of the course is to bring together a group of about 30 newly elected deans, vice-deans and heads of departments from universities in the African Region and to prepare them for the challenges of holding a dean's position in a changing higher education landscape. Issues such as strategic faculty management, financial management, quality assurance and leadership will be key parts of this course. A soft skills workshop and exchange with German university leaders about higher education reforms will be included as well.

The methodology will be strictly practice oriented and mainly based on case studies. Personal experience as a university manager will greatly contribute to this course and active participation will be necessary. The course starts in June with a seminar of about two weeks in Osnabrück and Berlin, Germany. Participants are expected to bring along a description of their work situation (university governance structure) and to develop a Project Action Plan (PAP) at the end of the first contact phase in Germany. This PAP is a project management tool and refers to a reform project which all participants are asked to implement during various stages of the course. The milestones of the PAPs will be further discussed during the intermediate workshop in Kenya (Part II). Finally, Part III offers the opportunity to reflect on the finalisation of the projects and to discuss lessons learned among the group. Both Part II and III include additional sessions on relevant higher education management topics.
